

Driving a Zilch EV

BMW i3

Step 1: Checking & unlocking the car

First, check the car for any damage. Then tap your access card over the card reader on the front windscreen to unlock (just a quick tap is all that's needed!). Second, unplug charger.

Step 2: Turn on the car

Depress brake pedal (with foot) and press the 'START/STOP' button once.

Step 3: Getting ready to go

With foot on brake pedal, release handbrake (P). Twist lever to select gear. Your gear will illuminate. Take foot off brake pedal and drive as usual.

Step 4: Stopping & parking the car

With foot on the brake pedal, press the 'P' (park button) to put the car into park. Pull up on (P) lever between the two front seats to engage handbrake. Press the START/STOP button once to turn the car off. Tap card over card reader on windscreen to lock the car (unless you're about to charge).

Step 5: Charging the car

- Returning to the same hub/car park you collected the car from, park in any available Zilch parking bay.
- Turn car off and open the charger flap (push on external flap located on driver's side rear panel).
- Plug charger into car and tap access card on reader on front of charging unit to activate.
- Lock car by tapping access card on reader on front windscreen – and don't forget to end your booking!
