

Charging your Zilch EV

Using public chargers

Types of chargers

Zilch EVs are compatible with 'Type 2' and 'CCS2' plugs.

How to find a charger

We recommend the following apps to find a public charger:

- ChargeNet app
- PlugShare app

How to charge

Turn car off and open the charger flap (push on external flap located on driver's side rear panel).

Plug charger into car and, if it's a ChargeNet charger, tap access card on reader on front of charging unit to activate.

Charging etiquette

- Respect the max charge time.
- Take only what you need.
- Update PlugShare if you come across a charger in need of maintenance.
